

## View, Copy and Print Virtually Any File

With support for over 300 different file formats, QuickView Plus 11 Standard Edition lets you view nearly all the files and e-mail attachments you need, instantly—without purchasing numerous software programs. QuickView Plus Standard Edition maintains the formatting of the files you view. So you can see and print files as they were originally created and meant to be seen, complete with fonts, text formatting and graphics.

### **Universal Information Access**

By providing access to information created in over 300 Windows, Macintosh, Internet, and DOS formats, QuickView Plus Standard Edition enables employees to access information from virtually any source: e-mail attachments, the web, networks and more.

### **Reduce Software Licensing Expenses**

QuickView Plus Standard Edition reduces costs by eliminating the need to buy native applications solely for file viewing. Instead of purchasing various programs simply to view files, QuickView Plus Standard Edition lets users view the information at a fraction of the cost. With QuickView Plus Standard Edition, you have immediate access to the information you need regardless of whether or not you have the application used to create the file installed.

### **Improve Productivity**

QuickView Plus Standard Edition allows users to efficiently work with information by providing a consistent environment for viewing, copying, printing, and searching information. Whether accessing e-mail attachments, documents on the Web, or files stored on a network, its easy-to-use interface provides users the

tools they need to quickly and easily access information. QuickView Plus Standard Edition supports various information access points including Windows Explorer, major e-mail programs and leading Web browsers.

### **Increased Security**

Security software packages don't always detect the latest viruses. Now you can eliminate the danger of potentially devastating new macro viruses on your network. All it takes is having QuickView Plus Standard Edition as the default method of viewing e-mail attachments. Because QuickView Plus Standard Edition displays the content of a file without opening it, any attached viruses are prevented from activating and doing their damage.

### **Easy to Deploy**

QuickView Plus Standard Edition offers a variety of installation options for rapid company-wide deployment including SMS-enabled client installation and scripted installs. If installed company-wide, IT departments can use QuickView Plus Standard Edition to ensure that consistent, reliable access to business information will not be compromised by an application software upgrade or other technology changes.
